President Michael  
Kaas-Andersen, ZBC

Finn Carlsen,  
direktør, EUC Syd

”Our aim is to get the students ready for the labour market and help them develop and utilise their potential”

# About DCAC

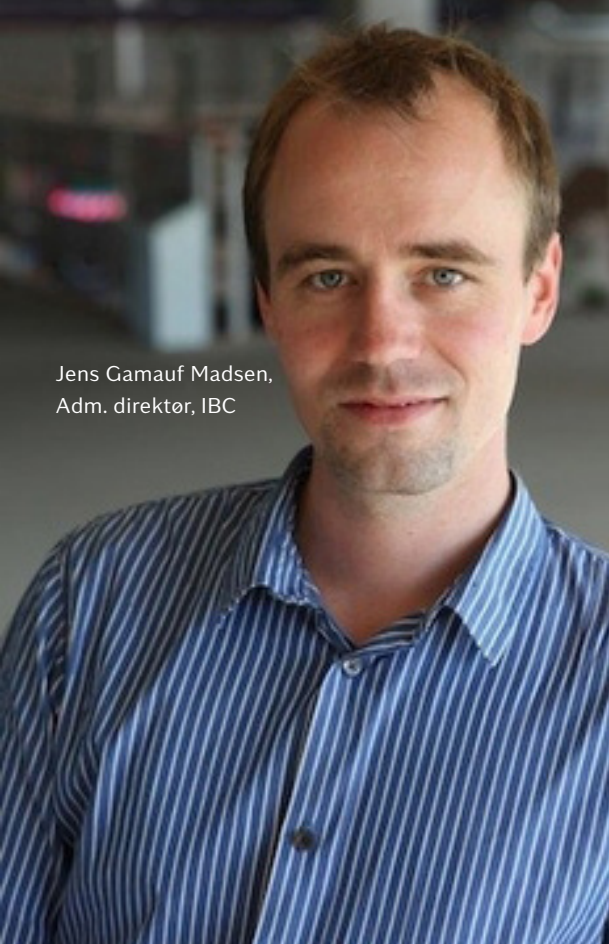

The Danish Consortium of Academic Craftmanship - VET Denmark consist of four VET-colleges.

The Consortium represent the whole range of more than 150 different VET-programs and ongoing education for VET teachers and VET managers. Our VET courses lead to both highly practical and very technical jobs.

Changing the world can mean many things at DCAC: You can change your own world by educating yourself and thereby gaining the job that will give you the life you want.

Through your education you can also develop and influence the sector you work in and thereby change the world of food experiences, construction techniques etc. Therefore, ZBC strives to get our students prepared to change the world by educating the workforce of tomorrow.

We always combine craftsmanship with innovation and development, so our students

Jens Gamauf Madsen,  
Adm. direktør, IBC

Kristian Stagis,  
Udviklingsdirektør,  
TEC Copenhagen

have the capability to do the best job possible and at the same time challenge the traditional way of doing things, so they remain the best in the field. techniques etc. Therefore, DCAC strives to get our students prepared to change the world by educating the workforce of tomorrow. We always combine craftsmanship with innovation and development, so our students have the capability to do the best job possible and at the same time challenge the traditional way of doing things, so they remain the best in the field.

**At DCAC we have 4 strategic aims that all have this in mind:**

- DCAC partners are appointed by the Danish Ministry of Education to be Knowledge center for Food, Healthcare

Technology, Knowledge Centre for Automation and robot and Knowledge centre for green Buildings and Technology.

- Work with changing learning environments, where we challenge habits and traditions by exploring new ways of teaching and developing our college in both physical and pedagogical ways
- A strong focus on quality
- Our colleges are close to the labour market, and we work closely with all relevant stakeholders in order to provide the best education and supply the workforce with the expertise and skills they need
- We believe in having a solid supply of courses and therefore strive to have local colleges.

For many years our retail students have won the Danish Retail Award for best final exam. In 2017 Morten won the honorable prize.

# International experience

At DCAC we have many years of international experience - from exchange of staff and students' programs and cooperations to selling educational solutions in foreign countries.

In cooperation with Danish world leading business, we develop programs that prepare the students for the requirements of each country. In many countries we also provide consultancy service e.g. in establishing VET in Africa, India, US, China and the Middle East.

As an example, we collaborate with partner schools in China, US and Argentina when it comes to students and staff exchanges and development of mutual courses and train the trainer cooperation.

We have sold courses and food and beverage courses to for example India and have didactic cooperation with leading businesses in India. Among others with the Taj hotel School for Management.

In Eastern Europe, ZBC have experience with education exports to both offshore and onshore in regard to our butcher division for example. Our Office of International Collaboration (PIU) works with institutional partners to provide international opportunities for all students at DCAC.

Foreign students from abroad studying in Denmark at on of our pastry lab.

# Highly skilled trainers

Due to our international activities, we have highly competent teachers who have worked and lived abroad and therefore has extensive international experience.

The teachers travels the world as trainers for the Danish pastry and baker national teams.

”At ZBC, our highest aim is to provide high, practical education”

Private Service  
Level 3 of Restaurant

HORESTA

In Abu Dhabi, our chef won the 3<sup>rd</sup> price at the World Skills.

# We have a strong focus in participating in international competitions

In 2017, our student Nikolaj won Skills Denmark and is being awarded the first prize by the Danish Prime Minister Lars Løkke Rasmussen.

# This is DCAC

- › Denmark's largest Vocational Consortium

”The Danish society’s investment in education, innovation and research has paid back manyfold”

# Education in focus

In Denmark it has for generations stood out clearly, that our future, wealth and prosperity relies on our knowledge and capability to innovate. Education has led to the society we have today and that's why education is extremely important in Denmark.

In a society where raw materials are limited, education becomes vital for the development of society, for the individuals and for future generations to build and maintain a society that can ensure a good and contentous life to all inhabitants.

Education thus becomes the supporting element and a prerequisite for applied knowledge, innovation and research that will ensure the development and the production to ensure and maintain the financing of citizens' goods and living standards in society.

The Danish society's investment in education, innovation and research has paid back many fold, whereas a lack of investment will put a society behind with a long-term negative effect.

Investment in education, innovation and research thus becomes the decisive "raw material" in a society where extraction of raw material and production are not naturally occurring.

# The Danish way of education

Employability is the aim in everything we do at DCAC

In Denmark, VET education is dual training in cooperation between companies and schools and that leads to high employability.

The Danish educational system emphasises independent thinking, each student taking responsibility for his or her own career, project- and group work and creativity. Our VET students can choose to combine high school education with vocational school so that they can continue their studies at university.

## **How can DCAC provide excellent training for a promising future?**

The practical experience is what makes our students great. In one of the happiest nations in the world, we teach our students the skills they need for the future through a problem-solving approach.

”The Danish educational system emphasises independent thinking, each student taking responsibility for his or her own career”

Check out the video  
”Danish Education for All”  
produced by the Ministry of Education. It presents  
the basic principles of the Danish education system  
for foreigners.

Our teaching is always very practice oriented which makes it relevant and realistic.

# Learning and teaching model

DCAC provides learning experiences that mirror the complex learning and performance found in today's organisations that meets the labour market demands of tomorrow.

Our pedagogy and didactic methods are based on individual learning depending on where the student is in the learning process. We use different learning methods, for example blended learning and learning based on teacher and students on the one hand - and we involve the latest technological and digital opportunities on the other hand.

We teach our students to be successful managers in a globalised world through cooperation in groups and projects.

Our learning methods are workplace oriented in order to exchange skills related to collaboration so that all our students learn to take independent decisions that are required.

Our learning methods mean that our students will learn to see the world differently and gain stronger soft skills e.g. like influencing, collaborating-, and thinking adaptively.

”The employers of tomorrow must have an innovative mindset - and that is what we give our students”

# Areas of study

We maintain the breadth of education and high-quality education. In Denmark VET education offers a dynamic interface with the world of work and business. After education, the student goes to an apprenticeship with a business.

## Food & Hospitality

Baker, Pastry Chef, Nutrition Assistant, Chef, Waiter service, Young chef, Restaurant service, Banquet, Front office, Gourmet Butcher, Industrial Butcher, Catering, Restaurant manager

Denmark is well known for producing food which at the same time is both high quality and experimental. Danish restaurants like Kin Kin are some of the best in the world. DCAC's schools are leading in food and hospitality courses in Denmark. We teach the entire range of professions in this sector. Besides being Denmark's biggest school, we constantly strive to be the absolute best in this area.

Our teachers are the best in the field and we constantly develop and renew our approach while focusing on the handcraft and traditions that makes a great food experience. Our focus is to provide our student with quality and service in mind when they learn about food and hospitality.

## Business & Retail

Retail with specialities, event coordinator, business with specialities and finance

In the business and retail courses, we give the student the skills to give the customer an excellent experience, no matter what. The courses focus on administration, business and sales, which are key competencies in this sector.

We use real life and relevant experiences when we train the customer contact situations, and provide with knowledge in both traditional retail stores, online shops and the

most modern technology in the field.

As a part of our retail education elections, we offer Danish retail chains study trips to London and Berlin for example, where we teach and show them state of the art retail development, so they are prepared for the future.

We also bring this knowledge to our other business and retail courses.

# Industrial

Automation technician, industrial technician, data technician, electronics, radio- and TV supporter, IT supporter, process operator, watchmaker and toolmaker

DCAC are well known for high level industrial courses that lead to employment because the Danish highly specialised industrial production constantly demand expert skills when it comes to further education too.

We build our workshops on the theoretical and hands-on training focusing on Robotics, industry 4.0, 3D print and 3D simulation programming.

DCAC provides industrial education courses that are important for the progressing digital society.

The integration of new technology is important in order to give the students an education that meets the needs of the future development. That is why we also give our students real life experiences in the training.

## Construction

House painter, flooring contractor, carpenter, building assembly technician, electrician, bricklayer, smith and plumber

In Denmark, we have a long handcrafting tradition and high-level quality residential buildings that meet both strict environmental requirements and the ever-changing climate in Denmark. At DCAC, we educate both students, trainers and further training to this area and provide expertise knowledge.

At the same time, we give the students insights in the various elements of construction, to provide them with the understanding of the important interfaces and connections between the professions on a construction site.

## Transport

Auto mechanic, truck mechanic, warehouse and terminal operator and road freight

In Denmark, most of the transport takes place on the road and consequently DCAC's transport courses aim to provide students with logistic skills that are essential for the entire trade market - the skills to repair the means

of transportation and to perform the transport themselves, in a secure and economic way without overloading finance or environment.

# Agriculture

Landscape gardener, landscape gardener assistant, agricultural equipment operator, agricultural assistant, farmer and landscape structurer

In Denmark we have a long history of effective farming and modern agriculture, where commodities are distributed to most of the world's food production and the agricultural products is one of the biggest exports in the Danish economy.

Denmark is a proud agricultural community that uses the latest technology and knows how to produce with a high outcome while the production is sustainable.

Through our agricultural courses we contribute to this development and lead these great traditions on to the next generation, while we continually strive to develop the area through our training courses.

“Denmark is one of the leading countries in the world when it comes to world class welfare system”

## Healthcare

Social and health assistant, social and health carer, Health Care Technology for Technicians and pedagogical assistant

Denmark is one of the leading countries in the world when it comes to world class welfare system and an inspiration to other countries. We have specialised in Healthcare courses and our teachers have the latest

knowledge and at DCAC we have the technical equipment to give world class education to our students and when we train the trainers.

## Service

### Security Guard and Service Assistant (cleaning)

At DCAC, we educate our students in providing the service of securing and cleaning. We have many years of experience with courses in the service industry and have carefully organised a wide range of courses at all levels in the areas of guard, laundry and cleaning service,

both continuing education and introduction to the industries. Our courses strengthen the professional skills within security. We are Denmark's only course provider in the laundry area, and one of the only schools that educate in security.

# High school education

~~Technical colleges and business colleges~~

At DCAC we have many different business-oriented colleges, with both technical and business in focus and from where you can go directly to the university. Here we teach the students business development and technical and biological understanding, so they through their high school degree get the

best possible prerequisites for their further studies at the university. This is a special way of getting your high school diploma, because we offer a unique insight in the areas that the education has.

# Leadership development

Diploma in Leadership, leadership management,  
MBA in Leadership – full-time and part-time

DCAC specialises in developing competencies by offering courses in leadership and management for all sectors up to master's degree level. This way the workforce can keep on developing their career, and the industry can, through education of their current employees,

gain the skills that are needed to develop the business. Our Full Time MBA is in English and also offered to foreign students, preparing our students for the needs of international careers as leaders in the global business world.

**Center of Masters**

~~”ZBC is Denmark’s largest provider of courses and further training”~~

# Lifelong learning

In Denmark, we have high ambitions for our human resources and we have an integrated course and training system for adults. It’s all founded on the philosophy that options for education and access to new professions and competencies should always be on hand through life, from the cradle to the grave.

DCAC is Denmark’s largest provider of courses and further training - we have continuing education in all dominant industries. Auditing, curriculum development, educational quality control and adaptive learning is at the forefront of our minds when we continuously train our workforce to the highest level.

DCAC has significant international experience when it comes to selling further education courses in other countries also with structuring programs and courses that fit the specific needs of the business community in other countries.

# Denmark at a glance

Denmark is a small Scandinavian country (43,098 km<sup>2</sup>) in northern Europe with a population of 5,585,000 (2012) of which 1.2 million live in Greater Copenhagen, the capital.

Denmark has been a kingdom since approx. 900 AD and has been a constitutional monarchy since 1849. The Kingdom of Denmark also comprises the Faroe Islands and Greenland; nations that today enjoy

extensive home rule and have their own parliaments, culture and language. The official language in Denmark is Danish but English is widely spoken.

# Partnerships

~~The Danish Consortium for academic craftsmanship, DCAC~~ work together in order to deliver the best education possible.
